Panasonic

Digital Cordless Phone

Model No. KX-TCD705HK

Operating Instructions

Caller ID Compatible

PLEASE READ BEFORE USE AND SAVE

Charge the batteries for approx. 10 hours before initial use.

Dear purchaser,

You have acquired a KX-TCD705HK, which is a product made in regard with the European Standards for Cordless Telephones (DECT). DECT technology is characterized by high-security protection against interceptions as well as high-quality digital transmission.

This telephone was designed for a wide range of applications.

For example, this telephone can be used within a network of base units and handsets, constituting a telephone system which:

- operates up to 6 handsets at one base unit
- · allows an intercom between handsets
- allows the operation of a handset at up to 4 base units, expanding the communication radio area.

This telephone may be used for:

- operating several handsets
- operating at several base units
- connecting the base unit to a PBX.

For your future reference

Safety instructions

Take special care to follow the safety suggestions listed below.

Environment

- 1) Do not use this unit near water—for example, near a bathtub, washbowl, sink, etc. Damp basements should also be avoided.
- 2) The unit should be kept away from heat sources such as radiators, cookers, etc. It also should not be placed in rooms where the temperature is less than 5°C or greater than 40°C.
- 3) The AC adaptor is used as the main disconnect device, ensure that the AC outlet is located/installed near the unit and is easily accessible.

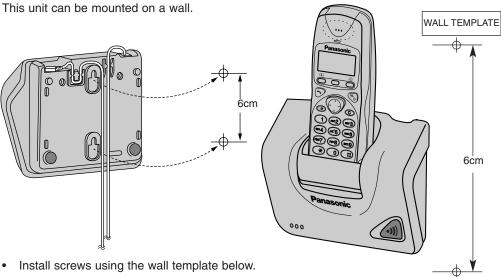

Placement

- 1) Do not place heavy objects on top of this unit.
- Care should be taken so that objects do not fall onto, and liquids are not spilled into, the unit. Do not subject this unit to excessive smoke, dust, mechanical vibration or shock.
- 3) Place the unit on a flat surface.

WARNING:

TO PREVENT THE RISK OF FIRE OR ELECTRICAL SHOCK, DO NOT EXPOSE THIS PRODUCT TO RAIN OR ANY TYPE OF MOISTURE.

Wall Mounting

- · Connect the line cord, and AC Adaptor.
- Arrange the wires as shown, then mount the unit.

Getting Started

Connections

Plug in the AC Adaptor and the telephone line cord to the rear of the unit. Then connect the cord as shown.

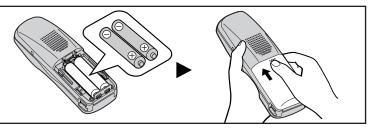

USE ONLY WITH Panasonic AC ADAPTOR PQLV1E.

- The AC Adaptor must remain connected at all times. (It is normal for the adaptor to feel warm during use.)
- To connect a standard telephone on the same line, see page 51.
- If your unit is connected to a Telephone line or PBX which does not support Caller ID services, you cannot access those services.

Installing the Batteries in the Handset

 If the rechargeable batteries are not inserted correctly, the handset will not work.

Battery Charge

At the time of shipment, the batteries are not charged. To charge, place the handset on the base unit. Please charge the batteries for approximately 10 hours before initial use. During charging, the battery icon is as shown.

Battery Strength

You can check the present battery strength on the display.

Battery strength	Fully charged	Medium	Low	No power
Battery icon	-	Ü		(Flashing)

Recharge

When "I flashes or the unit beeps every 15 seconds, recharge the batteries.

Battery Information

After your batteries are fully charged:

Operation	Ni-MH battery life (Included)	Ni-Cd battery life (optional)
While in use (Talk)	Up to about 20 hours	Up to about 12 hours (based on 800m/A per hour)
While not in use (Standby)	Up to about 160 hours	Up to about 100 hours

- Battery life may vary depending on usage conditions, such as:
 - when viewing the Caller ID Caller List,
 - when the handset is in the speakerphone mode and
 - ambient temperature.
- Clean the handset charge contacts with a soft, dry cloth once a month. Clean
 more often if the unit is subject to grease, dust or high humidity. Otherwise the
 batteries may not charge properly.
- If the batteries are fully charged, you do not have to place the handset on the base unit
 until "I" flashes. This will maximise the battery life.
- The batteries cannot be overcharged.

Getting Started

Battery Caution:

To reduce the risk of fire or injury to persons, read and follow these instructions.

- Use only the batteries specified.
- Do not use non-rechargeable batteries.
- Do not mix old and new batteries.
- 4. Do not dispose of the batteries in a fire, they may explode. Check with local waste management codes for special disposal instructions.
- 5. Do not open or mutilate the batteries. Released electrolyte is corrosive and may cause burns or injury to the eyes or skin. The electrolyte may be toxic if swallowed.
- 6. Exercise care in handling the batteries in order not to short the batteries with conductive materials such as rings, bracelets, and keys. The batteries and/or conductor may overheat and cause burns.
- 7. Charge the batteries provided with or identified for use with this product only in accordance with the instructions and limitations specified in this manual.

Battery Replacement

If "-" flashes after a few telephone calls even when the handset batteries have been fully charged, it is time to replace the batteries with new ones. Remember to charge the new batteries after replacement (see page 7).

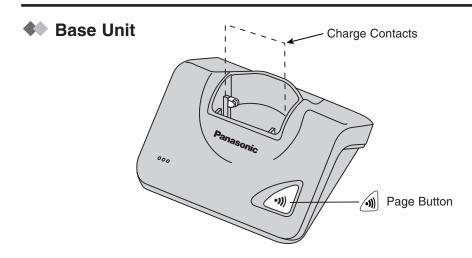

- Discard defective batteries as soon as possible. Defective batteries may leak into the unit.
- On replacing the batteries, ensure that the correct battery type selection is programmed (see page 38).

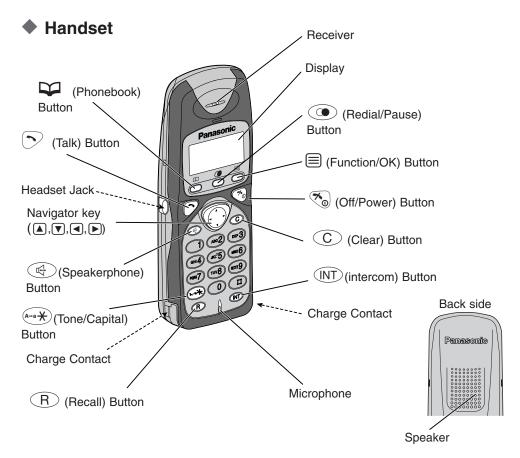

Base Unit Location

For maximum distance and noise-free operation, the recommended base unit location is:

- Away from electrical appliances such as TV, radio, personal computer or another telephone.
- In a convenient high and central location.

Location of Controls

Displays

Handset Display

♦ Icons

The in-range icon indicates that the handset is in range of the base unit. It flashes when the handset is out of range.

when page/intercom icon is displayed when paging or using the intercom. It flashes when another unit pages the handset.

The talk icon is displayed when making or answering calls. It flashes when an external call is being received.

The call prohibition icon is displayed when this mode is

turned on.
The phonebook icon is displayed when storing or viewing the phonebook items.

The battery icon indicates the battery strength.

Characters/Symbols

- P 'Pause' is selected while dialling.
- Here the this mode is turned on.
- F R is pressed while dialling.
- [X] The key lock icon is displayed when key lock is set on the handset. In this mode, the keypad is disabled.

Display Backlight

The handset has a backlight display. The display will light when you start using the handset and when a call is received. The handset display light will stay on for about 10 seconds after pressing a button or lifting the handset off the base unit. You can change the backlight colour for identifying callers by setting the private category feature (page17).

♦ Lighted Handset Keypad

The handset dialling buttons will light when you press a button, lift the handset off the base unit or receive a call. The lights will go out about 10 seconds after pressing a button, lifting the handset or answering a call.

Basic Start-up Operations

Note: Shows that you should press the following key(s).

Turning the Power On

- 1. 🤝 and hold 🗞
 - A confirmation tone sounds.
 - · All possible configurations briefly appear.
 - When button is released, the display will change to the standby mode.
 - ① The current connected base unit number is displayed
 - You can choose whether to display the base unit number, handset number or no display in the standby mode (see page 37).
 - 2 The number of New Caller ID calls received are displayed.

Making a Call

(For further information on making calls, see pages 12-15)

- **1.** (♣) **?** or ♠.
- 2. Dial a phone number.

The dialled number is displayed.

(If a number is entered incorrectly, 🔊 🗞).

After a few seconds, the display will start showing the length of the call.

♦ Terminating a Call

- 1. To hang up, 🤝 🦠.
 - After a few seconds, the display returns to the standby mode.
 - If the handset is placed on the base or charger during a call, the call is disconnected.
 - · The dialled number is stored in the redial memory.

Answering a Call

(For further information on answering calls, see page 16.)

During Incoming call:

- 1. 🗫 🔊
 - You can also answer a call by pressing any dialling button **0** to **9**, **7**, **1** or **1** (-Any Key Answer).

Or > d and when the other party answers, talk into the microphone.

After a few seconds, the display will start showing the length of the call.

Turning the Power Off

Make sure that the unit is in the standby mode.

- 1. 🤝 and hold 🦠 until a long beep sounds.
 - The display will go blank. (On location of the handset in the base unit, the battery icon will display even after power off).

Making Calls

Note: for basic making calls operation, see page 11.

To Dial after Confirming the Entered Number

With this feature you are able to confirm the entered number before you start dialling.

1. Enter a phone number (maximum 24 digits)

If number is not entered correctly:

To clear all digits, 🤝 and hold C.

Phone number confirmed, or or .
 (After a few seconds, the display will start showing the length of the call).

3. To end call, () . (After a few seconds, the display returns to the standby mode).

00 - 00 - 31

 You can choose whether to display the length of the call or phone number in the talk mode by programming (page 37).

◆ To Have a Hands-Free Phone Conversation (Using Digital Speakerphone)

- 1. 🔊 🚯
 - The button lights.
- 2. Enter a phone number.
 - The dialled number is displayed.
- 3. When the other party answers, talk into the microphone.
- 4. To hang up, 🤝 🗞.

Handset Digital Speakerphone

For best performance, please note the following:

- Talk alternately with the caller in a quiet room.

- While talking, you can switch to the hands-free phone conversation by pressing .
 To switch back to the receiver, .
 or .

Making Calls

To Redial the Last Number Dialled

There are two ways to redial the last number dialled.

- 1. 🔊 🕥 or 🚯.
- 2. (>> (•).

(The last number dialled is displayed and automatically redialled).

01234567890 (111)

00-00-00

(III)

After a few seconds, the length of call is displayed.

OR

- **1**. ♦ **>** or ♠.
- 2. 🔝 🗏
- 3. Select 'Redial'.
- 4. 🤝 🗐

(The last number dialled is displayed and automatically redialled).

To Redial after Confirming the Numbers in Redial Memory

The unit automatically stores the last 10 numbers dialled into redial memory.

1. (>> (••).

(The last number dialled is displayed).

 If the same number has been stored in the phonebook, the name will also be displayed.

01234567890

00-00-00

- (To exit the list, (So C).
- **3.** (♣ 🔊 or ♠).

The number is redialled automatically. (After a few seconds the length of call is displayed).

- If a number is not selected within one minute, redial mode is cancelled and display returns to standby mode.
- If 'No Stored Memory' is displayed in step 1, the redial memory is empty.

To Edit/Clear Numbers in the Redial List

To edit and clear numbers in the redial memory, (so one), select number and then follow from step 2 (pages 29 and 30). 'Editing the Caller's Name / Phone Number', 'To Clear an Individual Entry in the Caller ID List' and 'To Clear All Entries in the Caller ID List'.

Auto Redial

When speakerphone is turned on and redial used, the number is dialled automatically. If the number is busy, the unit goes into auto redial mode. The unit automatically repeats the call (max. 12 times) until the called party answers the call.

Make sure that the unit is in the standby mode.

- **1**. 🔊 🚯.
- 2. 🔝 💿.
 - The last redial number is displayed and dialled to outside line.
 - The Mic on handset is mute until a 'busy tone' or 'ring back tone' is detected.

- If a busy tone is detected, the unit releases the outside line and returns to the standby mode. The speakerphone button LED flashes. After 40 seconds, the speakerphone LED turns steady on and the number is redialled automatically.
- If a ring back tone is detected, the mic is not mute, "-Muting-" is cleared from the 1st line, the unit finishes Auto Redial and display goes to conversation.
- If the user presses during Auto Redial, redial is cancelled and unit returns to speakerphone.
- If a busy tone or ring back tone is not detected within 30 seconds, the unit finishes Auto Redial procedure and unit returns to standby.

To Select the Receiver Volume or Speaker Volume during conversation

3 levels are available during conversation or when using the headset (high, medium or low).

6 levels are available in the speakerphone mode.

- - = receiver volume up
 - ▼ = receiver volume down.
- After a few seconds, the display returns to the length of call.

➡ Making Calls

♦ Direct Call

You can store one number into memory and then call this number by pressing \bigcirc or \bigcirc . (See pages 37, 39).

Hot Key Dialling

You can assign up to 9 numbers from the phonebook as Hot Key Dials. After numbers have been stored (see page 25) you can press buttons 1 to 9 and then 5 or 4 to call the number.

◆ Dialling a Number from the Phonebook or Caller ID List

- Dialling a number from the Phonebook (see page 21).
- Dialling a number from the Caller ID List (see page 29).

Answering Calls

For basic answering call operation, see page 11.

 The handset and base unit will not ring if both ringer volumes are set to OFF (pages 36, 44).

4 Auto Talk

If you set the Auto Talk Feature to ON (page 38), you can answer a call by lifting the handset off the base unit without pressing \bigcirc or \bigcirc .

◆ To Turn the Handset Ringer Off Temporarily

When an external call is incoming, user can turn off ringer temporarily.

- 2. Answer call by pressing , 0-wx9, +x+, I or NT (-Any Key Answer).
 - The ringer will turn back on for the next call.
 - This function will not work when the handset is on the base unit or if an internal call is incoming
 - If 'Ringer Off' is selected, Caller ID cannot be displayed.

Using the Phonebook

You can store up to 200 names and phone numbers in the phonebook. All phonebook items are sorted by the first word in alphabetical order. Using the phonebook, you can make a call by selecting a name on the display.

You can also assign the caller's information to one of 9 private categories (1-9) to use the private category feature (page 18). This feature is only available after subscribing to Caller ID.

Private category feature:

You can select display backlight colour and ringer type for each private category. When receiving a call, you can easily figure out who has called. (For example, Category 1 for family, Category 2 for friends and Category 9 for business).

When a call is received from the caller belonging to one of the private categories, the handset will ring with the selected ringer type and the display will light in the selected colour for each private category. If you do not assign an item to any private category number, the handset will ring in the preset ringer type and light in the preset colour when receiving a call.

Entry example:

F	Phonebook items	Backlight colour	Ringer type
Phone	Private category no. (1-9)	(3 colours)	(1-20)
numbers	1: Family	Red	1
and names (up	2: Friends	Orange	2
to 200)	3: Neighbours	Green	3
	;	:	:
	9: Business	Red	20
	OFF	Pre-selected colour	Pre-selected type

Example:

When receiving a call from a caller belonging to category 1;

- the handset rings in the ringer type 1.
- the display backlight lights in red.
- When receiving a call, selected ringer type and display backlight colour are determined by the following order: Private category feature and then the pre-selected colour and ringer type.

Storing Names and Numbers in the Phonebook

18

Make sure that the unit is in the standby mode.

- 1. ⟨₃>> **■** or **▶**.
- 2. Select 'New Phonebook'.
- 3. 🤝 🗏 or ▶.
 - The display shows the number of remaining phonebook items, then '<Enter Name>'.
- Enter a name (up to 16 characters) with the dialling buttons, <a>or <a>D.
 See steps for entering names and symbols (page 19,20).
- 5. Name confirmed 🤝 ▼.
- 6. Enter phone number (up to 24 digits).
- 7. Number confirmed, 🤝 🗏.
- 9. ⟨≫ **(** or **(** .
- 10. Select 'Save'.
- 11. ⟨ ≫ **■** or **▶**.
 - A beep sounds and 'Saved' is displayed.
 - The display shows the number of remaining phonebook items, then '<Enter Name>'. You can continue storing other items.

 - If a pause is required for dialling,
 If a pause is inserted while entering a phone number, the pause counts as one digit.
 - If the display shows 'Memory Full' in step 3, the display will return to the standby mode. To store, clear other stored items in the phonebook (pages 22).
 - You can exit the programming mode at any time by pressing .

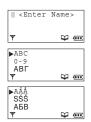

➡ Using the Phonebook

♦ To Enter Names Selecting Characters

The dialling buttons can be used to enter letters and character symbols. The letters are printed on the dialing buttons. Pressing each button selects a character as shown on page 20.

To change the character mode

- 2. ⋄ or ▲ until the arrow points to the desired character mode, then ⋄ ≡ or ▶.
 - The character mode is displayed.

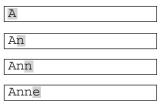

For example, to enter 'Anne'.

- 1. (\$> (ABC 2).
- 2. > A-a * , then MOG TWICE.
- 3.

 ▶ then

 TWICE.
- 4. S OEF 3 TWICE.

◆ If you make a mistake while entering a Name/Number

- To delete one number/letter, 🔊 C. (Items are deleted to the left of the cursor).
- To delete all numbers/letters, > and hold C.
- To add a number/letter, move cursor to required position. Press number/letter. The item is added to the left of the cursor.

OY = Greek special Character. SP = Space,

The following small letters of Greek, Russian (Cyrillic), Polish, Czech and Slovakian are not available. As a result of this, the capital letter will be displayed: a ć č ď ę ě łíľ ń ň ŕ ř ş ś š ť ź ż ž

- To move the cursor I to the left.
- To move the cursor I to the right. (To enter another character using the same dialling button, move the cursor to the next space).
 - (C)(*
 - To erase characters. To shift from capital to lower case. Each time you press $\stackrel{\leftarrow *}{\leftarrow *}$, the mode will change.

➡ Using the Phonebook

♦ Finding Items in the Phonebook

Make sure that the unit is in the standby mode.

All phonebook items are sorted in the following order:

Alphabet Letter/Symbol/Number/Telephone Number (when a name is not stored).

- 1. 🗫 🕶 to enter the phonebook.
 - · The first item is displayed.
 - If 'No stored Memory' is displayed, the phonebook is empty. The handset will return to the standby mode.
- 2. or until desired name is displayed.

To search for a name by initial

- - The first item is displayed.
- Press the dialling button for the first letter of the desired name until any name with the same initial is displayed.
 - The letters are printed on the dialling buttons.

 Eg. To find 'Felix', (per 3) repeatedly until the first item under 'F' is displayed.

♦ Dialling from the Phonebook

Make sure that the unit is in the standby mode.

- 1. 🔝 💟.
- - · You can also search for an item by initial.
 - To exit the phonebook, Sol.
- 3. 🔊 🤊 or 🐵.
 - · The number is dialled automatically.
- 4. To hang up, 🤝 🗞 or place the handset on the base unit.

◆ Editing an Item in the Phonebook

Make sure that the unit is in the standby mode.

- 1. 🔝 💴.
- - · You can also search for the item by initial.
- 3. ⟨≫ ≡ or ▶.
- 4. Select 'Edit', then ▷ or ▶.
 - If you do not need to change the name, go to step 6.
- 5. Edit the name using the dialling buttons, **◄**, **▶** or **○**.
- 6. 🤝 ▼.
 - If you do not need to change the number, go to step 8.
- 7. Edit the number using the dialling buttons, ◀, ▶ or ℂ.
- 8. 🤝 🗐.
- 10. Select 'Save', then 🤝 🗏 or ▶.
 - A confirmation tone sounds and 'Saved' is displayed.

Clearing an Item from the Phonebook

Make sure that the unit is in the standby mode.

- 1. 🔝 💴.
- 3. 🤝 🗏 or ▶.
- 4. ♦ to select 'Clear'.
- 5. 🤝 🗏 or ▶.
- 6. ♦ to select 'YES'.
- 7. 🤝 🗏 or ▶.
 - A confirmation tone sounds. 'CLEARED' is displayed.
 - After a few seconds, the display will show the next item.
 - If the phonebook item is registered as a 'Hot Key Dial', 'Hot Key Dial' is displayed as the phonebook item is cleared.
 - To return to the standby mode,

➡ Using the Phonebook

♦ Phonebook Copy

You can copy the information in the phonebook between the handsets registered in the same base unit. The phonebook copy must be operated in intercom mode (see page 31). Eg. Handset 1 is copying a specified item in the phonebook to Handset 2 during an intercom call.

23

• Handset 1 (Sender):

- 1. (\$> (NT).
- 2. (3) (ABC 2).

· Handset 2 (Receiver):

- 1. 🔝 🕥.
- 2. ⟨≫ 圖.
- 3. So to select 'Recv Phonebook'.
- 4. 🤝 🗏 or ▶.
 - 'Copy Proceeding' is displayed.

• Handset 1 (Sender):

- 3. ⟨₃⊳ ⊜.
- 4. Select 'Send Phonebook'.
- 5. ⟨ ⇒ | □ or **.** □.
- 7. ⟨ ≫ 🗏 or ▶.
- 8. Select 'Copy Entry'.
- 9. 🤝 🗏 or ▶.
 - After copying is completed, a confirmation tone sounds and 'Copy Complete' is displayed on both handsets.
 - After a few seconds, the display will return to intercom call.
 - If 'Copy Incomplete' is displayed, the receiver handset memory is full or the receiver handset is disconnected before copying is completed.
 - If 'Copy Failure' is displayed, the receiver and/or sender did not prepare for copying within 60 seconds.

Eg. Handset 1 is copying more than one item in the phonebook to Handset 2.

Handset 1 (Sender):

Follow steps 1-5 on Handset 1 on page 23.

1. ♦ or ▲ to select item in Phonebook

(All items AFTER the selected one are copied).

- 2. ⟨ ⇒ or ▶ .
- 3. So to select 'Copy Forward'.
- 4. ⟨ ҈ > or **.**

Handset 2 (Receiver):

Follow steps 1-4 on Handset 2 on page 23.

- After copying is completed, a confirmation tone sounds and 'Copy Complete' is displayed on both handsets.
- After a few seconds, the display will return to the intercom call.

Note:

· To cancel copying at any time:

© to return to intercom

or

to return to the standby mode.

➡ Using the Phonebook

Storing Phonebook Items as Hot Key Dials

The dialling buttons (1-9) function as one-touch dials. You can assign up to 9 phone numbers from the phonebook as Hot Key Dials.

Make sure that the unit is in the standby mode.

- 1. 🗫 🕰.
- 3. ⟨ >> (≡) or (▶).
- 4. So to select 'Reg. to Hot Key'.
- 5. 🤝 🗏 or ▶.
 - If an item is already stored to a Hot Key, '√' will be displayed on the left of the key number.
- 7. ⟨≫ **■** or **▶**.
- 8. Select 'Save', then S ≡ or C OR

 If a hot key number with '√' is selected, select 'Overwrite',

 then S ≡ or C.

A confirmation sounds and the display will return to the next phonebook item.

Req. to Hot Key

₩

Edit

Clear ▶Reg. to Hot Key

►Key 1 Key 2

Dialling a Stored Number

Make sure that the unit is in the standby mode.

- 1. Press and hold a hot key number (1-9)
 - The stored number is displayed.
- 2. \triangleright \bullet or \blacktriangle until the desired item / number is displayed.
- 3. 🤝 🤊 or ೀ.
 - The number is dialled automatically.
- 4. To hang up, 🤝 🦠

OR

Place the handset on the base.

2:29 pm

Clearing an Item in the Hot Key Dial

- 1. Press and hold a hot key number (1-9)
 - The stored number is displayed.
- 2. or ▲ until the desired item is displayed.
- >> ■. 3.
- Select 'Clear'.
- 5. (३० 🗐.
- ▼ to select 'YES'. 6.
- 7. 🤝 🗏 or **▶**.
 - · A confirmation tone sounds.
 - · Next Hot Key Dial is displayed. If no other hot keys are stored, display returns to standby mode.

Caller ID Service

Caller ID, where available, is a telephone company service. After subscribing to Caller ID, this phone will display the caller's phone number (and name if it has previously been stored in the Phonebook)

This unit is compatible with a Caller ID service offered by your telephone company. If you should subscribe to a Caller ID service, the calling party's information will be shown on the handset display after the first ring.

You cannot access the Caller ID service while using the handset and base unit for an internal call.

How Caller Information is Displayed when a Call is Received

- **Incoming Call**
- Caller's phone number is displayed after first ring. (If the phone number and name has previously been stored in the phonebook, the caller's name will also be displayed).
- 1. > or (Length of call is displayed).
 - Caller's information cannot be displayed in the following cases:
 - If the caller dialled from an area which does not provide a Caller ID service, the display will show 'Out of Area'.
 - If the caller has requested not to display his/her phone number, the display will show 'Private Caller'.

Note: If 'Out of Area' or 'Private Caller' calls, private ringer does not sound. (Default ringer is sounded).

If your unit is connected to a telephone line or a PBX which does not support Caller ID service, you cannot access those services.

Checking the Number of New Calls

In the standby mode, when new calls have been received, the display shows the number of new calls.

For example, if you have received 10 new calls the display will show the following.

10 New Calls 01.08 21:58

28

Using the Caller List

Viewing the Caller List

You can view the caller list of each handset which has received calls. Caller list information includes the caller's phone number (If name and number have been stored in the phonebook, the caller's name and number will be displayed), the date and time the call was received. Up to 50 different callers are stored from the most recent to the oldest in the caller list. When the 51st call is received, the oldest call is deleted. To confirm who has called you, follow the steps below.

Ensure display is in the standby mode eg. (2 new calls).

- - · If 'No Stored Memory' is displayed in step 2, the Caller List is empty.
 - If more than one call is received from the same caller only the most recent call will be recorded.
- 3. To exit the list, 🔝 🦠.
 - Display returns to standby mode.
 - New call counter is cleared.

```
JAMES ONODA
0123456789
17.08 14:59
              •
```

What '\seconds' means

When you have checked new calls, answered the call or called back the caller, '√' will be added.

When the same caller calls again, the call entry with '√' will be deleted and replaced with the new call entry.

01234567890 15.08 19:51 🗸

When viewing long telephone numbers

If the caller's number is greater than 16 digits the whole telephone number will not be shown. \bigcirc or 3 to see the remaining numbers.

Using the Caller List

♦ Calling Back from the Caller List

Using the list you can automatically call back a caller.

- 1. → v or to select Caller ID number.
- 2. 🔊 🔊 or 🚯.
 - After a few seconds the length of call is displayed.
- 3. To hang up 🤝 🗞.

(The handset will return to the standby mode).

Editing the Caller's Name / Number

You can edit a phone number in the Caller List. After editing the number, you can continue with calling back or phonebook storing procedures.

- 2. 🤝 🗏 or ▶
- 3. ♦ v to select 'Edit for Call'.
- S ≡ or ►.
 (To edit a name / number, see page 19).

5. To call back, 🔊 🔿 or 🚭

To store the number in the phonebook, >> \equiv . >> to select 'Save Phonebook'. >> \equiv or \triangleright , then follow from step 4, page 18.

Note: If the number has been dialled, the number will be stored in the redial list.

Clearing the Caller List

You can clear an individual entry or all entries in the Caller List.

- To clear an individual entry in the Caller ID List
- 2. ⟨ ⇒ | □ or **.** □.
- 4. ⟨ ⇒ | □ or **.**
- 6. ⟨ 🔊 🗏 or **▶**.
- Next Caller ID number is displayed.

To Clear All Entries in the Caller ID List

- 1. ♦ ▼ or ▲ to display Caller ID List.
- 2. 🤝 🗏 or ▶.
- 3. ▼ or ▲ to select 'All Clear'.
- 4. ⟨₃> or ▶.
- 5. ♦ to select 'YES'.
- 6. 🤝 🗏 or ▶.
 - · Display returns to the standby mode.
 - Note: If 'NO' is selected, Caller ID is not deleted and unit returns to Caller ID List.

◆ Storing the Caller List Information in the Phonebook

You can store phone numbers that are in the Caller List into the phonebook. You can also assign the caller information to one of 9 categories to use the private category feature.

30

- 2. or or to select phone number to save.
- 3. ⟨≫ **■** or **▶**.
- 4. Select 'Save Phonebook'.
- 5. 🤝 🗏 or ▶.
 - The display shows the number of remaining phonebook items then <Enter Name>.
- 6. Enter name (if required), up to 16 characters (pages 19, 20).

Then follow from step 5 on page 18 (Storing names and numbers in the phonebook).

Paging/Intercom

♦ Paging All Handsets from the Base Unit

- 1. (So •1) (On the Base Unit).
 - · All handsets will ring for one minute.
- 2. To stop paging, (>> •)) again or (>> (>) on one of the handsets.

♦ Intercom between Handsets

A 2-way intercom is available between handsets.

Eg. Handset 1 is paging Handset 2

- 1. (Handset 1) (NT). (Int icon blinks until connection is established).
- 2. (Handset 1) (>> ABC2).
- 3. (Handset 2)

When the unit rings, (S) (NT), (0) to (MT), (11) or (Any Key Answer), to answer.

- If Auto Talk is set to 'ON' (page 38) the call is answered when the handset is lifted from the base.
- · The intercom duration is displayed.

4. (Handsets 1 and 2)

To end the intercom, 🤝 🤏.

 Intercom calls can be conducted within the radio area of the current base unit, but not with units in neighbouring radio areas.

Intercom cannot be accepted in the following areas:

- when the other party is in intercom mode.
- when the other party is on hold during external call.
- while the other party is in conference call.

◆ Transferring a Call from One Handset to Another

The intercom can be used during a call, enabling you to transfer a call between handsets registered to the same base unit.

Transferring a Call using the Intercom

Eg. Handset 1 is transferring an external call to Handset 2.

1. (Handset 1)

During a call, ((Intercom icon turns on).

The call is put on hold.

2. (Handset 1) > desired handset no. eg.

 You will hear an internal ring back tone until the other handset is answered.

Base 1 2 New Calls

TNT.1

Y".1)

INT. 1

INT.1-INT.2

00-00-00

(III

Transferring a Call using the Intercom (continued) 3. (Handset 2) When the unit rings, ⟨>> ⟨>>, ⟨NT⟩, ⟨0⟩ to ⟨∞→9⟩, □□ or ⟨∞→→⟩ (-Any Key Answer), to answer.

4. (Handset 1) Transferring a call (>> %)
The transfer is completed

OR

To return to the External Call (>> (NT).

Transferring a Call without the Intercom

This feature enables you to transfer an external call to another handset without waiting for the paged handset to answer.

Eg. Handset 1 is transferring an external call to Handset 2.

1. (Handset 1)

During a call, ((Intercom icon turns on).

- · The call is put on hold.
- 2. (Handset 1) object desired handset no. eg. (ABC2)
 - You will hear an internal ring back tone until the other handset is answered.
- 3. (Handset 1) 🤝 🗞.
- 4. (Handset 2) When the unit rings, >> > or <a> to answer.
 - The transfer is completed.

Conference

During an external call, you can make an intercom call to another handset and then combine the calls together to establish a conference call. (The handsets have to be registered to the same base unit).

- 1. (Handset 1) During an external call, (In then enter the desired handset number eg. 2.
 - The external call is put on hold.
 - If there is no answer at handset No.2, () INT to return to the call.
- 2. (Handset 2) When the unit rings, (NT), (1) to (NT), (1) to (T), (1) or (-4) (-Any Key Answer) to answer.
- 3. (Handset 1) > (PEF 3) to establish a conference call.
- 4. (Handset 1 or 2) 🤝 🦠 to hang up on conference call.

For Optional Multi-Unit Users

Operating More than One Handset

You can register and operate up to 6 handsets at the base unit. Operating more than one handset allows you to have an internal call while simultaneously conducting an external phone call using another handset.

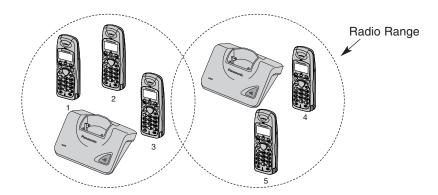

- The optional handset/charger model number is KX-A115EX. The functions of the optional handset are the same as those of KX-TCD705HK handset.
- · To register the handset to the base unit, see page 38.
- To cancel the handset, see page 46.

Operating More than One Base Unit

You can register and operate your handset at up to 4 base units.

Since each base unit forms a radio cell, you can extend the range or area in which you can make/answer calls with the same handset by placing the base units in suitable locations. For example you can use a handset in different radio areas, such as at home or the office. However, calls in progress are cancelled when the unit moves to another radio area.

Eg. 5 optional KX-A115EX handsets are added to 2 base units.

Selecting the Display Language

When an optional handset is purchased, the default language is English. To set to required language setting, follow the steps below:

Special Features

How to Use the Pause Feature

(For Analogue PBX Line/Long Distance Service Users)

We recommend you insert " " if a pause is required for dialling with a PBX or to access a long distance service (When is pressed, 'P' is displayed on LCD).

Eg. Line access number (VXYZ9) (PBX).

1. (and then phone number.

2. 🤝 🔊 or 🚯.

(After a few seconds, display will start showing the length of the call).

- Pressing once creates a pause. This prevents misdialling when you redial or dial a stored number.
- Pressing more than once increases the length of the pause between numbers.

Using the Recall Feature

(R) is used to access special telephone services (optional) such as call waiting (When R is pressed 'F' is displayed on LCD). Contact your telephone company for details.

Example: Call waiting

When a call waiting tone is heard during a conversation:

a) To hold the existing call and accept the waiting call.

- * Each time you 🔊 📵, you can switch between the first and second call.
- * Depending on the provider, you may need to enter a code after pressing (R).

Follow the instructions given to you by your provider.

b) To accept the waiting call and hang up the existing call.

> %. When the unit rings, > > to anwser the new call.

c) To reject the waiting call.

Wait for the call waiting to time out. This will take about 40 seconds. If your unit is connected to a PBX, pressing (R) allows you to access some features of your host PBX such as transferring an extension call.

➡ Special Features

◆ Setting the Key Lock (ON)

You can lock the handset dialling buttons. Only incoming calls are accepted until the key lock is cancelled. You can answer a call by pressing any dialling button 0 to 9, 4, 0 or N, (-Any Key Answer).

Make sure that the unit is in the standby mode.

- 1. 🤝 🗏 for more than 2 seconds.
 - · Confirmation tone sounds and all dialling buttons are locked.
 - '[X]' is displayed.

◆ To Cancel the Key Lock

Make sure that the unit is in the standby mode.

- 1. 🤝 🗏 for more than 2 seconds
 - A confirmation tone sounds.
 - '[X]' disappears and key lock is cancelled.

Base 1 2 New Calls 03.08 21:06

Note

- The key lock will also be cancelled when the power is turned OFF.
- When the handset is in 'Key Lock' mode, emergency calls cannot be made until the key lock is cancelled.

You can program the handset according to your needs. This display shows the instructions. After selecting "Setting Handset", the main menu is displayed. Most items in the main menu have a sub-menu. The sub-menu is shown after selecting the item in the main menu.

While programming:

- To return to the previous step during programming, 🤝 🖪.
- When programming is completed, a confirmation tone sounds and display returns to the function menu.
- You can exit the programming mode any time by pressing .

Setting Time Alarm

The handset(s) will sound an alarm at a preset time for 30 seconds once or everyday. To set the time, see below:-

In the 'Setting Handset' mode

displayed.

Select 'Time Alarm'

Select 'Set Alarm Time' **NOTE:** If time has previously been set, it will be

Select 'Save'

• To set the alarm ON/OFF, etc. see page 36.

To Stop the Alarm

When the alarm sounds, press any dialling button \bigcirc to \bigcirc to stop alarm.

The alarm time turns off and the display returns to the standby mode. If 'Once' is selected, the setting is automatically turned off.

If the unit is in the talk, speakerphone or intercom mode during the alarm time, the alarm will not sound. After finishing, the alarm will start ringing.

Setting Direct Call Number

You can store one number in the Direct Call memory. This feature allows you to make a call easily by pressing \bigcirc or \bigcirc . Incoming calls are accepted.

In the 'Setting Handset' mode

page 19.

Select 'Call Option'

Select
'Direct
Call No.'

NOTE: If number has previously been entered, the number is displayed. To edit the number, see

Select 'Save'

• To set the Direct Number ON/OFF, see page 37.

Dialing the Stored Number

- 1. Make sure that "→" is displayed in the standby mode.
- 2. 🦃 🤊 or 🗐.

The number stored in the direct call memory is dialled automatically.

When the handset is in the 'Direct Call' mode, it is not possible to make any calls until direct call is cancelled. This also includes emergency calls.

Setting the Handset PIN

You can program a 4 digit password for the handset. The factory pre-set is 0000. Changing the password may prevent the unauthorised use of your unit by another person.

In the 'Setting Handset' mode

Select 'Other Option'

Select 'Change Hset PIN' Enter the current 4-digit handset PIN.

NOTE: Once you have programmed the password, you cannot confirm it. We recommend you write down the password. If you forget it, please consult your nearest Panasonic Service Centre.

Enter the new 4-digit PIN TWICE. If 2nd PIN entry is incorrect, an error tone sounds and display returns to 'Enter New PIN'. If PIN is correct. a confirmation tone sounds.

Registering a Handset to a Base Unit

The handset supplied with the base unit is already registered. If an optional handset/base unit is purchased, the following procedure needs to be carried out before initial use.

્રિક્ર and hold (•ગે)) on base unit for more than10 seconds. A series of beeps begin to sound.

□ or ▶ ♠ ♠/▼ ♠ □ or ▶ ♠ ♠/▼ ♦ or ▶ ▶ Please Wait...

Select 'Registration'

Select 'Register

Select Base No. to register handset (1-4).

Handset searches selected base.

Enter Base PIN 🕨 🗐 or 🕟 🜓 Please Wait...

H/set'

- If registration is successful, a confirmation tone sounds and display returns to the standby mode. The selected base number is displayed in the standby mode.
- If registration is not successful within 5 minutes, an error tone sounds and display returns to original standby mode.

NOTES:

- Charge the optional handset batteries for about 10 hours before initial use.
- Register the handset number within 1 minute. If not registered within 1 minute, on the handset to cancel the programming mode. Then re-start registration.
- Calls (both incoming and outgoing) can be conducted only via the displayed base unit (even if the radio areas overlap with neighbouring base units).

→ Handset Programming

◆ Cancelling a Base Unit

If another handset is out of range and/or its power is OFF when 'Cancelling a Handset', the previous base unit number will still remain in the cancelled handset. Therefore, you need to cancel the base unit registered in the cancelled handset. In the 'Setting Handset' mode **▲**/**▼** □ or ▶ $\blacktriangle/ \blacktriangledown$ ■ or ▶ ▶ Enter H/set PIN ▶ **▲**/**▼** Select Select Registered base numbers are 'Registration' 'Cancel displayed. Select Base' base unit(s) to cancel. □ or ▶ □ or ▶ △/▼ ▶ □ or ▶ Select 'YES' The selected base units

Select Base Unit

are marked with '✓'.

Automatic Base Unit Access

The handset automatically selects a registered base unit.

- When the handset moves to another base unit radio area, it loses contact with the previous base unit and automatically accesses the new base unit.
- If the handset is in the overlap area between several base unit radio areas, the handset will access the nearest base unit.

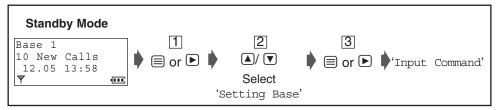

Base Programming

While programming:

- When programming is completed, a confirmation tone sounds and display returns to the function menu.
- You can exit the programming mode any time by pressing .

To change the Initial Settings

♦ Bell Selection

There are three choices for Bell Selection when a call is being received:-

- all handsets ring.
- the selected handset(s) ring(s).
- the selected handset rings first. Then if it does not answer, all other handsets will ring.

The factory preset is 'All handsets'. To change the bell selection, program as follows:

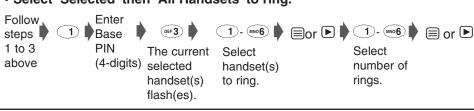

Select 'All Handsets' to ring.

Select 'Selected Handset(s)' to ring.

Select 'Selected' then 'All Handsets' to ring.

You can change the duration of the flash timing depending on the requirements of your network provider or PBX.

Select Flash Timing

Follow steps 1 to 3 on page 42

Enter

Base PIN

(4-digits)

Page 43

Current setting is displayed.

1 = Flash 1 (700m sec) 2 = Flash 2 (400m sec)

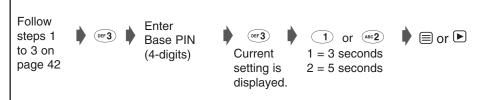

➡ Base Programming

Select the Base Unit Ringer Volume

4 levels are available. The factory preset is MEDIUM. When set to OFF, the base unit will not ring. Follow steps 1 0 - (DEF 3) ■ or ▶ (twice) to 3 on Select Volume. page 42 Current setting is displayed. 0 = Ringer OFF 1 = Low Volume 2 = Medium Volume 3 = High Volume (Ringer sounds on selection)

Select Pause Timing

You can set the pause timing to 3 or 5 seconds, depending on your PBX requirements. The factory preset is 3 seconds.

Set Base Unit PIN

You can program a 4-digit password for the base unit. The factory preset is 0000. Changing the password may prevent the unauthorised use of your unit by another person.

Follow steps 1 to 3 on page 42

Enter current Base PIN (4-digits)

Enter new Base PIN (4-digits) TWICE

If 2nd entry of NEW PIN is **incorrect**, an error tone sounds.

If 2nd entry is **correct**, a confirmation tone sounds and display returns to function menu.

NOTE: Once you have programmed the password, you cannot confirm it. We recommend you write down the password. If you forget it, please consult your nearest Panasonic Service Centre.

Call Restriction

You can restrict desired handset(s) from dialling selected phone numbers. Phone numbers beginning with the restricted digits cannot be dialled out.

For example, if "00" is assigned as the call restriction number, international calls cannot be made.

For selected handset(s) you can assign up to 6 call restriction numbers (up to 8 digits). Set the call restricted handset(s) and the restriction number(s) by programming. The factory pre-set is OFF.

♦ Reset Base Unit

This function enables the base unit to clear the current base settings at one time. They will return to their initial settings.

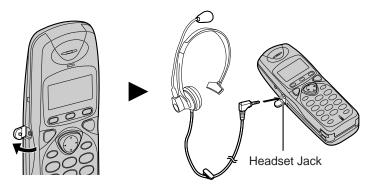

Follow steps 1 to steps 1

Using an Optional Headset

Plugging an optional headset into the handset allows a hands-free phone conversation. Please use only the Panasonic KX-TCA89EX headset.

Connecting the headset to the handset

Open the headset jack cover, and connect the headset to the headset jack as shown.

To adjust the headset receiver volume (HIGH, MEDIUM or LOW):

While using the headset, ⇒ ▲ or ▼.

When the optional headset is connected to the handset, make sure to use the headset to talk with the caller. If you want to have a normal cordless phone conversation, disconnect the headset.

Using the Belt Clip

You can hang the handset on your belt or pocket using the belt clip.

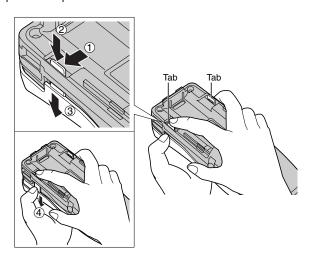

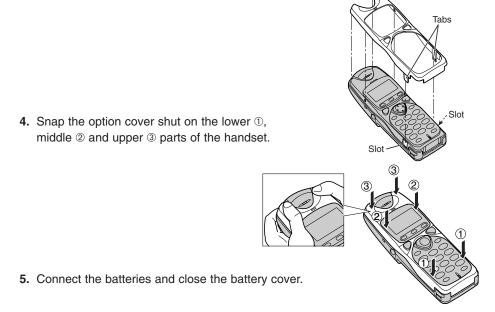

Option Covers

You can change the look of your phone's handset with option covers (KX-A109EX).

- 1. Remove the battery cover by sliding while pressing the arrow. Remove the batteries.
- 2. The option cover is locked with the right and left tabs. Unlock one of the tabs by pressing horizontally ① and vertically ②, and partially pull down the option cover ③, ④ as shown. Repeat this operation on other tab.

3. Place the new option cover fitting the tabs on the cover into their slots on the handset.
